

Würzburger

Mathematisches Kolloquium

Sommersemester 2026

Humboldt-Bau, Emil-Fischer-Str. 41, 00.006

Di 28.04.2026
14:15

Prof. Dr. Pamela Gorkin
(Bucknell University, USA)

Finding Ellipses: Blaschke Products and the Numerical Range

Di 12.05.2026
16:15

Prof. Dr. Paul Walton
(University of York, UK)

(Z6, Zentrales Hörsaal- u. Seminargebäude, 0.001)

Gender Equality in Academia: Why is it Taking so long?

Di 23.06.2026
14:15

Prof. Dr. Volker Schulz
(Universität Trier)

Second-Order Riemannian Optimization: From Shape Spaces to Tensors to Positive Definite Matrices

Di 30.06.2026
14:15

Prof. Dr. Nicolás García Trillos
(University of Wisconsin-Madison, USA / Giovanni-Prodi-Gastprofessor in diesem Semester)

Wasserstein-Cramér-Rao Theory of Unbiased Estimation and Tradeoffs Between Accuracy and Robustness of Estimators

Di 14.07.2026
14:15

Prof. Dr. Fleurianne Bertrand
(Technische Universität Chemnitz)

**Preserving Structure in PDE Approximation: How and How Much?
Finite Element Methods, Constrained Optimization, and Reduced Models**
