Symmetry results via the moving planes method

In this talk we will consider positive solutions to semilinear or quasilinear elliptic problems. We will deduce symmetry and monotonicity results of the solutions via the moving plane procedure of Alexandrov-Serrin.

Ort: Mathematik Ost, 40.03.003/Zoom

Zeit: Donnerstag, 01.12.2022 um 14:15 Uhr

You are cordially invited to this lecture. Request the Zoom link from
