Uniqueness of weak solutions to the multi-dimensional isentropic Euler system

Abstract:

We show uniqueness of weak solutions to the isentropic Euler system satisfying a one sided Lipschitz condition for the velocity gradient. Although prominent example of these are rarefaction waves, we are able to include a substantially larger class of solutions.

Raum 40.03.003 (Mathematikgebäude Ost)

Dienstag, der 22. Okt. 2019 um 13 Uhr

Zu diesem Vortrag sind Sie herzlich eingeladen.
