

Alfio Borzi

Professor of Mathematics

Experience

- 2011 - Now **Full Professor (Chair Mathematik IX)** [University of Würzburg, Germany](#)
Starting March 1st, 2011, till now, Full Professor (W3) and Chair of Mathematik IX 'Scientific Computing' at the Institute for Mathematics, University of Würzburg. I built up this new chair to its present status with a W2 and W1 professorships. In few years, I could make this chair internationally visible.
In 2011, I also got a call for the full professorship 'Algorithmic Optimization' at the Humboldt Universität zu Berlin that I declined.
- 2008 - 2011 **Associate Professor** [Università degli Studi del Sannio, Italy](#)
In the period 2008-2010, I was Associate Professor at the Università degli Studi del Sannio, in the Engineering Faculty. During this period, I collaborated to the LIGO project and started working on stochastic problems.
- 2003 - 2007 **Associate Professor** [University of Graz, Austria](#)
In the period 2003-2007, I was Associate Professor at Institute for Mathematics and Scientific Computing, Karl-Franzens-University Graz. During this period I was leading a FWF project on quantum control problems and a SFB sub-project on non-linear reaction-diffusion (monodomain) models for medical application.
- 1998 - 2003 **Assistant Professor** [University of Graz, Austria](#)
In 1998 - 2003, I was Assistant Professor at Institute for Mathematics and Scientific Computing Karl-Franzens-University Graz. My research focused on multigrid methods and optimal control problems.
- 1996 - 1997 **Research Engineer** [AVL List GmbH, Graz, Austria.](#)
During the period 1996 - 1997, I was Research Engineer in the internationally renowned company AVL List GmbH, Graz, Austria. I worked on gas dynamics problems and on finite-volume schemes for CFD problems.
- 1993 - 1995 **Research Officer** [University of Oxford, UK](#)
In 1993 - 1995, I was Research Officer at the Oxford University Computing Laboratory (OUCL), Oxford, UK, in the group of Professor Bill Morton. I worked on special finite-volume schemes and their solution by multigrid methods.
- 1991 - 1992 **Lieutenant** [CNMCA, Roma, Italy](#)
During the period 1991 - 1992, I was an Italian Air Force Officer (Lieutenant) serving at the Centro Nazionale di Meteorologia e Climatologia, CNMCA, Roma, Italy. I worked on data analysis and numerical weather prediction.

Education

- 1998 - 2003 **Habilitation** [Karl-Franzens-University Graz](#)
Habilitation at Karl-Franzens-University Graz, Austria.
- 1991 - 1993 **Dottore di ricerca in Matematica** [SISSA/ISAS, Italy](#)
Doctor Philosophy (Ph.D.) in Mathematical Physics, SISSA/ISAS-
International School for Advanced Studies, Trieste, Italy.
- 1988 - 1990 **Magister Philosophiae (M.Ph.) in Mathematical Physics** [SISSA/ISAS, Italy](#)
1988 - 1990 Master Philosophy (M.Ph.) in Mathematics, SISSA/ISAS-
International School for Advanced Studies, Trieste, Italy.
- 1983 - 1988 **Laurea in Fisica** [Università degli Studi di Catania, Italy](#)
1983 - 1988 Laurea in Physics (MSc), University of Catania, Italy.

Main research and teaching topics

1) Numerical solution of PDE optimization problems. 2) Development and analysis of multigrid methods. 3) Analysis of discretization schemes for partial differential equations. 4) Simulation and optimization with uncertainty. 5) Simulation and control of quantum systems. 6) Modeling and numerical solution of gas dynamics problems. 7) Modeling and simulation of bio-chemical processes. 8) Imaging analysis and inverse problems. 9) Multi-agent differential systems. 10) Stochastic models and control. 11) Fokker-Planck and continuity equations.

Research Work - Main Contributions

Trained in Mathematics and Physics, my main field of expertise consists in developing and connecting analytical and numerical methods in view of solving fundamental application problems that are often related to optimal control. I was among the early initiators, alone or in cooperation, of the following research fields

1. Multigrid methods for solving PDE optimality systems
2. Fast methods for solving quantum control problems
3. Fokker-Planck approach to stochastic control problems

Among my achievements, I also would like to mention the theoretical investigation of non-smooth PDE control problems, the analysis of the Kohn-Sham equations, the development of proximal and Pontryagin's MP schemes for PDE control problems, the modelling of leadership-based control of multi-agent systems, the development of optimisation schemes to solve imaging problems, and various numerical analysis results with linear and nonlinear PDE models.

Teaching

Analysis I and II, Linear Algebra I and II, Optimization I and II, Operations research, Complex Analysis, Functional analysis, Applied Analysis, Ordinary Differential Equations, Programming in C++, Numerical Analysis I and II, Theory of Partial Differential Equations, Multilevel methods

Reviewer

For Agencies:

DFG, ANVUR, The Royal Society of London, The Russian Science Foundation

For Journals:

SISC, SICON, SINUM, SIOPT, MMS, COAP, JCAM, JCOMP, JDCS, OMS, IJVC, NM:TMA, etc.

Hobby

Oil painting
gourmet cooking
poetry

in optimization with PDE models, Numerical Solution of Partial Differential Equations, Modeling and Scientific Computing, Simulation and Optimal Control of Quantum- and Stochastic Systems.

Memberships and fellowships

- Past member of EMS and SIAM.
- Tinsley Oden Fellow, Institute for Computational Engineering and Sciences, University of Texas at Austin, USA.

Professional responsibilities

- Member of the Research Council of the Hugo Steinhaus Center, Wrocław (Breslau). http://prac.im.pwr.wroc.pl/~hugo/HSC/hsc_ang.html
- Member of the Internationalisation Committee, Universität Würzburg. Member of the Commission for Research and Technology Transfer of the University of Würzburg. Past member of the Research in Sciences Committee, Universität Würzburg.
- Profesor Invitado of the PHD Program in Applied Mathematics at Escuela Politécnica Nacional de Ecuador. <http://www.math.epn.edu.ec/doctorado/index.php/profesores>

Editor Duty

Associate Editor:

SIAM Journal on Scientific Computing (SISC).

SIAM Review, Books section

Numerical Mathematics: Theory, Methods and Applications (NM-TMA).

Guest Editor of CVS, NLAA and NM:TMA.

Supervision of PhD Thesis

- **D. Kioi Gathungu**, *On multigrid and H-matrix methods for partial integro-differential equations*. PhD Math. Thesis, Univ. Würzburg, 2017.
- **M. Sprengel**, *A theoretical and numerical analysis of a Kohn-Sham equation and related control problems*, PhD Math. Thesis, Univ. Würzburg, 2017.
- **B. Gaviraghi**, *Theoretical and numerical analysis of Fokker-Planck optimal control problems for jump-diffusion processes*. PhD Math. Thesis, Univ. Würzburg, 2017.
- **A. Schindele**, *Proximal methods in medical image reconstruction and in nonsmooth optimal control of partial differential equations*. PhD Math. Thesis, Univ. Würzburg, 2016.
- **J. Merger**, *Optimal control and function identification in biological processes*. PhD Math. Thesis, Univ. Würzburg, 2016.
- **S. Wongkaew**, *On the control through leadership of multi-agent systems*. PhD Math. Thesis, Univ. Würzburg, 2015.
- **G. Ciaramella**, *Optimal control of quantum spin systems*. PhD Math. Thesis, Univ. Würzburg, 2015.
- **M. Mohammadi**, *Discretization of the Fokker-Planck equation and related control systems*. PhD Math. Thesis, Univ. Würzburg, 2015.

- **M. Munir Butt**, *Formulation and multigrid solution of Cauchy-Riemann optimal control problems*, PhD Math. Thesis, Univ. Graz, 2011.
- **M. Vallejos**, *Multigrid optimization methods for elliptic optimal control problems*. PhD Math. Thesis, Univ. Graz, 2008.

Ongoing:

- **T. Breitenbach**, *Efficient solution of PDE optimal control problems with the Pontryagin's maximum principle*, PhD Math. Thesis, ongoing.
- **F. Calà Campana**, *FP differential games*, PhD Math. Thesis, ongoing.
- **J. Bartsch**, *Boltzmann models*, PhD Math. Thesis, ongoing.

Supervision of Master Thesis (selection out of 17)

The supervision of Master thesis has given me always great satisfaction: it is the unique opportunity for very young students to taste the pleasure of achieving new results. The following Students were able to do great original research work :

- **Melina-Loren Kienle Garrido**, *On the optimal control of a new cancer therapy model*, MSc Math. Thesis, Univ. Würzburg, 2017. (with publication in Journal)
- **Lisa Schäfer**, *A mathematical investigation of a new Lorentz-covariant heat conduction model*, MSc Math. Thesis, Univ. Würzburg, 2017.
- **Andrea Thomann**, *Stability and accuracy of a pseudospectral scheme for the Wigner function equation*, MSc Math. Thesis, Univ. Würzburg, 2015. (with publication in Journal)
- **Veronika Thalhofer**, *Formulation and investigation of a new stochastic hybrid system for subtilin production and the corresponding Fokker-Planck equation*, MSc Math. Thesis, Univ. Würzburg, 2015. (with publication in Journal)
- **Julia Kwasny**, *Investigation of a robust single particle tracking algorithm*. MSc Math. Thesis, Univ. Würzburg, 2013.
- **Roberta Mancini**, *An adjoint-based optimization scheme for solving time-domain electromagnetic inverse scattering problems*, MSc Math. Thesis, Univ. Sannio, 2009.
- **Elisabeth Decker**, *Spectral methods for the Schrödinger equation*. MSc Math. Thesis, Univ. Graz, 2005. (with publication in Journal)

I have also supervised 10 Bachelor thesis.

Main Research Grants

- BFHZ Project **Multi-agent Fokker-Planck Nash games** (Project Leader, 1 year; start 2018). Supported by BMBF, Germany.
- BMBF-Verbundprojekt **ROENOBIO - Robust energy optimization of fermentation processes for the production of biogas and wine** (Project Leader, 4 years; start 2013), supported by BMBF, Germany.
- EU Marie-Curie **Multi-ITN STRIKE - Novel Methods in Computational Finance** (Project Leader, 3 years; start 2013). Supported by EU.
- IZKF-Project **Parallel Multigrid Imaging and Compressed Sensing for Dynamic 3D Magnetic Resonance Imaging** (Project Leader, 3 years; start 2013). Supported by IZKF Universität Würzburg, Germany.
- DFG Project **COCIQ, Controllability and Optimal Control of Interacting Quantum Dynamical Systems** (Project Leader, 3 years; start 2012). Supported by DFG, Germany.

- FWF-Project, MGINV-MOBIS, SFB Mathematical Optimization with Applications to Biomedical Sciences, **Fast Multigrid Methods for Inverse Problems** (Project Leader, 3 years; start 2008). Supported by FWF, Austria.
- FWF-Project, **Quantum optimal control of semiconductor nanostructures** (Project Leader, 3.5 years; start 2005). Supported by FWF, Austria.

Industrial Projects

- CFD Optimal shape design.
- PARALLEL AMG: Investigation and Development.
- Boundary Conditions Calculation in gas-dynamics package BOOST.
- The Simulation of the Gas Dynamics with Perforated Pipes in Plenum or in Pipes with BOOST.
- Comparison of Multigrid and SOR for the Solution of the Reynolds Equation in EXCITE.

Organization of Workshops/Conferences

- Organizer and Chair of the European Multigrid Conference EMG2010, Isola d'Ischia, Italy, 2010.
- European Science Foundation OPTPDE Workshop Fast solvers for simulation, inversion, and control of wave propagation problems, 26 - 28 September 2011, University of Würzburg, Germany. (ESF Grant 22.000 Eur)
- Weizmann Workshop 2013 on Multilevel Computational Methods and Optimization, The Weizmann Institute of Science, April 30 - May 02, 2013, Rehovot, Israel.
- European Science Foundation OPTPDE Workshop ESF OPTPDE Workshop InterDyn2013, 10 - 12 September 2013, Université Paris-Dauphine, Paris, France. (ESF Grant 26.000 Eur)
- Multi-ITN STRIKE and WWCS Mini-Workshop in Stochastic Computing and Optimization, Würzburg, Germany, September 30 - October 2, 2014
- 27th IFIP TC7 Conference 2015 on System Modelling and Optimization, Sophia Antipolis, France, 29.6. - 3.7.2015: Two Minisymposia: 1) Quantum optimal control; 2) Sparse reconstruction and medical imaging.

Some Invited Talks

- On the optimal control of a Kohn-Sham quantum model, Workshop PRACSYS 2018: Principles and Applications of Control in Quantum Systems, Henri Poincaré Institute, July 2018, Paris, France.
- From Brownian to pedestrian motion and Fokker-Planck Nash games, Lothar-Collatz-Kolloquium für Angewandte Mathematik, Fachbereich Mathematik, Universität Hamburg, June 2018, Hamburg, Germany.
- From Brownian to pedestrian motion and Fokker-Planck Nash games, Lomonosov State University, April 2018, Moscow, Russia.
- From Brownian motion to pedestrian avoidance, Mathematisches und Mathematikdidaktisches Kolloquium, Universität Oldenburg, November 2017, Oldenburg, Germany.

- On the solution of some PDE control problems in the framework of the Pontryagin's maximum principle, Workshop INDAM 'Numerical methods for optimal control problems: algorithms, analysis and applications', June 2017, Rome, Italy.
- On a Fokker-Planck Nash game to model pedestrian motion, Schwerpunktskolloquium, University of Konstanz, October 2017, Germany.
- Fast iterative schemes for solving PDE control problems with the Pontryagin maximum principle, Institute of Numerical Mathematics (INM) at the Steklov Institute of Mathematics, February 2017, Moscow, Russia.
- Analysis of a pseudospectral scheme for the Wigner function equation, Workshop Mathematical Models for Quantum and Classical Mechanics, SEMODAY 2016, Nov. 17-18, 2016, Florence, Italy.
- On a time-dependent Kohn-Sham equation and related optimal control problems, CECAM Workshop Numerical methods for optimal control of open quantum systems, Sept. 26-28, 2016, FU Berlin, Berlin, Germany.
- Advances in the numerical solution of quantum control problems, Workshop Quantum Cybernetics & Control 2015 (QCC2015), Jan. 19-23, 2015, Nottingham, UK.
- A Fokker-Planck strategy to control stochastic processes, Marian Smoluchowski Symposium on Statistical Physics, Sept. 22-26, 2014, Zakopane, Poland.
- A Fokker-Planck Strategy to Control Stochastic Processes, Kolloquium, 2014 April, Johann Radon Institute for Computational and Applied Mathematics (RICAM), Austrian Academy of Sciences, Linz, Austria.
- Fast and accurate computational methods for quantum control problems, 536th W.E. Heraeus Seminar on Optimal Control of Quantum Systems June 16th to 19th 2013, Physikzentrum Bad Honnef, Germany.
- A Fokker-Planck-Kolmogorov control framework for stochastic processes, Workshop Numerical Methods for Uncertainty Quantification, May 13-17, 2013, Hausdorff Center for Mathematics, Bonn, Germany.
- An Optimal Control Strategy for Probability Density Functions of Stochastic Processes and Piecewise Deterministic Processes, Mathematisches Kolloquium, Univ. Bayreuth, Jan. 2013, Germany.
